

Donnelly Centre PDF and RA Seminar Series

Remaining challenged, engaged, and
relevant on my Science Jungle Gym

Dr. Leanne Wybenga-Groot, PhD

Research Scientist and Facility Manager
Molecular Analysis (SPARC BioCentre)
SickKids Research Institute, Toronto

From crystallography and biochemistry, to high-throughput screening and now proteomics, my career path has not been a predictable (or traditional) one. So how does one develop a meaningful science career outside of the “faculty stream” (while balancing “life”)? I’ve been asked to share my story... and am happy to do so. I will also discuss my new role as Manager of SPARC BioCentre, a core proteomics/mass spectrometry facility at SickKids, and how SPARC services may be able to ignite your research.

DATE: Monday June 11th, 2018

TIME: 12:00 – 1:00 pm

LOCATION: Red Room

Donnelly Centre
for Cellular + Biomolecular Research

UNIVERSITY OF
TORONTO
